ABORTION BY SMARTPHONE

Many people think that the decision to overturn Roe v Wade in 2022 was the end of abortion, but all that it did was return the decision on abortion to the individual states. Some states immediately banned abortions, others immediately made abortion at any stage totally legal, while most states settled on some restrictions but still allowing the killing of unborn children.

But in the social atmosphere of our culture, the humanist groups insist that all states must allow free access to abortion at any stage for any reason and are spending tremendous amounts of money to try to promote that. That is the reason for issue 1 in Ohio - a yes vote is one for abortion at any time of pregnancy and for any reason at all, while a no vote keeps some limited restrictions on it. But there is now a new tool being used to bypass even the state votes and any limitations - it is an "abortion bot" - an internet site that says its purpose is to 'help people find accessible health care (that health care meaning killing the baby). A user is asked for their zip code, and then they are given the names and locations of vetted clinics (if the state allows abortions), or telehealth providers and resources (if the state has banned abortions). This app encouraging users to find alternative ways to still have an abortion, be it by mail order pills, or by traveling out of state to another that allows abortions. In this way, they can kill their baby and face no legal repercussions. This online app or 'bot' is called 'Charlie' and it goes to great lengths to ensure anonymity - asking users to take security precautions, not tell anyone about the abortion (especially friends or family), to delete their search history after using, to use the incognito mode or use a browser that doesn't store the user's activity.

Charlie immediately encrypts all data, and the time frame of the search, so that law enforcement cannot use subpoenas to get information in states where abortion is banned. While places like Google do allow pro-life crisis pregnancy centers to advertise, they are often displayed in a way that makes a searcher confused and intimidated. But Charlie, by contrast, clearly offers abortion providers, financial and psychological support - teams of doctors and lawyers.

The pro-abortion lobby is doing all they can to ensure women can kill their babies including using any and all of the latest technology to destroy unborn lives.

We as God's people must teach the truth of God's word - that children are a blessing from the Lord, not merely a growth of unwanted cells. That we are made in the image of God and that the unborn babies are human beings with a soul, not an evolutionary stage in development. And as Ps 139 says - we are fearfully and wonderfully made, knitted together in our mother's womb by our loving God who knows each of us and has a plan for our lives.
